

Canoeing Route

The length of the route is 12 km and the difficulty is medium. It begins at Valai (55.27112, 24.99715) and ends at Siesarties village (55.29169, 24.89402).

At the beginning there are some trees fallen into the river and some beautiful bends of the river.

7km from the start there is a hydroelectric power station and canoes can be transported over the barrier on the left shore. You should be careful there as the shore is slippery. Also, a legend says that it is a place where witches used to be sacrificed, so have in mind that their souls might even push you into the river 😊.

In you will reach some gorgeous remains of an old mill and have fun moving your canoe through.

The finish is at the bridge of Lyduokiai – Žemaitkiemis road, you will be able to set on the left shore.
